THIRTY-SEVENTH
ANNUAL ANNOUNCEMENT

OF THE

St. Louis Medical College,

SEVENTH AND MYRTLE STREETS,

WINTER SESSION, 1878-79,

— AND —

CATALOGUE FOR 1877-78.

THE REGULAR COURSE OF LECTURES WILL COMMENCE ON MONDAY,
OCTOBER 7, 1878, AND CONTINUE FIVE MONTHS
FROM THE DATE OF BEGINNING.

GLOBE-DEMOCRAT JOB PRINTING COMPANY.
1878.

ST. LOUIS MEDICAL COLLEGE.

BOARD OF TRUSTEES.

W. G. ELIOT, D.D.,	-	-	PRESIDENT.
JOHN LAUGHTON, M.D.,	-	-	VICE-PRESIDENT,
JAMES E. YEATMAN,	-	-	SECRETARY.

WM. G. ELIOT, D.D.,	JAMES E. YEATMAN,
NATHANIEL HOLMES,	GEORGE PENN, M.D.,
JOHN LAUGHTON, M.D.,	BENJ. FARRAR,
WAYMAN CROW,	CARLOS S. GREELEY,
THOMAS ALLEN,	ADOLPH WISLIZENUS, M.D.,
HENRY HITCHCOCK,	HENRY S. TURNER,
BENJAMIN O'FALLON,	SYLVESTER H. LAFLIN,
FELIX COSTE,	M. DWIGHT COLLIER,
NATHAN COLE,	WILLIAM GLASGOW, JR.

FACULTY.

A. LITTON, M. D.,
Professor of Chemistry and Pharmacy.

J. B. JOHNSON, M. D.,
Professor of the Principles and Practice of Medicine.

E. H. GREGORY, M. D.,
Professor of the Principles and Practice of Surgery and Clinical Surgery.

J. T. HODGEN, M. D.,
Professor of Surgical Anatomy, Special Fractures and Dislocations, and
Clinical Surgery at the City Hospital.

J. S. B. ALLEYNE, M. D.,
Professor of Therapeutics and Materia Medica, and Diseases of Children.

E. F. SMITH, M. D.,
Professor of Clinical Medicine and Pathological Anatomy.

L. CH. BOISLINIERE, M. D.,
Professor of Obstetrics and Diseases of Women.

J. J. McDOWELL, M. D.,
Professor of Anatomy.

G. BAUMGARTEN, M. D.,
Professor of Physiology.

H. H. MUDD, M. D.,
Demonstrator of Anatomy.

H. T. BOUTWELL, M. D.,
Assistant Demonstrator of Anatomy.

J. T. HODGEN, M. D.,
DEAN.

ANNUAL CIRCULAR.

1878-79.

The collegiate year of the St. Louis Medical College embraces a Spring Session, and a Winter Session preceded by a Preliminary Course of Lectures.

The Spring Session of 1878 begins March 11th, and continues through eleven weeks to June 1st.

The Preliminary Lectures will be given by members of the Faculty, from September 9th until the beginning of the regular course.

The thirty-seventh regular Winter Session will commence on Monday, October 7th, 1878, and continue five months from the date of beginning.

COURSE OF INSTRUCTION.

It will be the aim of the Faculty to give the student as complete and practical a medical education as is possible in the time allotted. The individual branches will be treated by the following methods:

CHEMISTRY is taught in lectures (three a week) illustrated by experiments and specimens; the course embracing also selected chapters on physical science. A rich collection of chemicals and chemical and physical apparatus is at the disposal of the Professor of Chemistry. Recitations in Chemistry are given during the Spring Session, by Dr. C. M. Litton (two a week).

Instruction in Practical Chemistry in the Laboratory is given under the supervision of the Professor of Chemistry.

ANATOMY.—Lectures (three a week) with practical demonstrations, and daily instruction in dissections. The anatomical rooms are large, well ventilated and lighted, and supplied with every convenience. They are under the superintendence and direction of the Professor of Anatomy and the Demonstrator, one of whom will always be present to assist the student in his anatomical studies. **SURGICAL ANATOMY** is taught in a separate course of lectures, abundantly illustrated by dissections, (three a week) during part of the Winter Session. Recitations in Anatomy are held twice a week during the Spring Session, by Dr. H. T. Boutwell.

HISTOLOGY is taught by the Professor of Physiology in lectures, with the aid of magic lantern diagrams and photographs of microscopic preparations.

PHYSIOLOGY.—The lectures (three a week) are illustrated by diagrams, chemical and physical experiments, and vivisections.

THERAPEUTICS AND MATERIA MEDICA.—The lectures (three a week) are illustrated by a very extensive cabinet of *materia medica*, with numerous plates, and a large collection of dried specimens of medicinal plants, and carefully selected samples of drugs, educating the senses to the physical properties of medicinal substances. During the Spring Session Dr. W. E. Fischel lectures on select chapters of this branch, twice a week.

PRINCIPLES AND PRACTICE OF MEDICINE.—Didactic lectures three times a week. **MEDICAL CLINICS** are held four times a week, alternately at the City Hospital and at the St. Louis (Sisters') Hospital. In connection with these clinical lectures the student receives also special instruction in auscultation and percussion. During the Spring Session, Dr. J. M. Scott conducts a medical clinic at the City Hospital twice a week, and delivers additional didactic lectures (one a week) on Physical Diagnosis.

PATHOLOGICAL ANATOMY is taught in connection with clinical medicine, the College possessing abundant resources for illustrating this branch in its extensive collection of pathological preparations and wax and plaster models. Full opportunity is afforded for observing the appearances of disease after death; recent specimens are constantly on hand, and the student has access to the dead-rooms of the hospitals. During the Spring Course, Dr. G. J. Engelmann, the Curator of the Pathological Museum of the College, utilizes this material at the City Hospital, by giving instruction in Pathological Anatomy in connection with post-mortem examinations twice a week.

DISEASES OF CHILDREN.—Didactic lectures once a week. During the Spring Session clinical lectures upon the same branch by Dr. G. A. Moses once a week, at the St. Louis Hospital.

A course of lectures (one a week) on **DISEASES OF THE NERVOUS SYSTEM** is delivered by Prof. C. W. Stevens during the Spring Session.

SKIN DISEASES AND SYPHILIS are taught during the Spring Session in lectures (two a week) by Dr. L. A. LeBeau.

SURGERY.—Didactic lectures (three a week). Surgical clinics are conducted throughout the year by Prof. Gregory, at the St. Louis Hospital (three a week), and by Prof. Hodgen, at the City Hospital (two a week.)

SPECIAL FRACTURES AND DISLOCATIONS are the subject of separate lectures (three a week) during part of the Winter Session.

Instruction in **MINOR** and in **OPERATIVE SURGERY** is given during the Spring Session, by Dr. H. H. Mudd, twice a week, with exercises in the usual operations on the dead subject.

THE PHYSIOLOGY AND PATHOLOGY OF THE EYE are taught during the Spring Session, in didactic lectures, twice a week, by Dr. J. Green. Clinical instruction in this branch is afforded throughout the year, at the St. Louis Eye and Ear Infirmary three times a week, and at the City Hospital twice a week. Senior students can also obtain access to the ophthalmic clinic of Dr. S. Pollak, at the St. Louis Hospital, three times a week.

A LARYNGOLOGICAL CLINIC is conducted during the Spring Session, by Dr. W. C. Glasgow, at the St. Louis Hospital, twice a week.

GYNÆCOLOGY is taught during the Spring Session, in lectures (two a week) by Dr. W. L. Barret. Gynæcological clinics are conducted throughout the year, by Prof. Boisliniere, with the assistance of Dr. G. A. Moses, at the St. Louis Hospital, twice a week.

OBSTETRICS.—Lectures (three a week). The course is profusely illustrated by the large and valuable collection of specimens of Prof. Boisliniere, and includes exercises in all the usual operations upon the manikin. Cases of midwifery are procured for the advanced students.

CLINICS.

THE CITY HOSPITAL, eligibly situated and easily accessible, in which nearly four thousand patients are treated annually, is visited regularly by Profs. J. T. Hodgen and E. F. Smith, who preside over the Surgical and Medical Clinic respectively. Ophthalmic Clinics are held twice a week, throughout the year, at the Hospital, by Dr. John Green, consulting surgeon to the hospital.

THE ST. LOUIS (OR SISTERS') HOSPITAL, on Grand and St. Louis Avenues, affords in like manner, great advantages for clinical study, being entirely under the control of the St. Louis Medical College in so far as relates to its clinical facilities.

The surgical clinic of Prof. E. H. Gregory is unsurpassed in the variety and importance of the cases treated. All the major and minor operations of surgery may be here witnessed by the student who is faithful in the pursuit of his hospital studies.

The gynæcological clinic of Prof. L. Ch. Boisliniere is held at this hospital, twice a week, throughout the year. A certain number of the senior students accompany the Professor, and under his supervision perform all the manipulations connected with uterine examinations, thus, in connection with the observation of the diseases and their treatment, giving the most ample opportunities to the student, as well as to practitioners, in the study of this specialty. An Eye and Ear Clinic is held three times a week, at this hospital under the charge of Dr. S. Pollak, who will afford every opportunity of obtaining a knowledge of this important branch. A Clinic of Laryngoscopy and Diseases of the Air-Passages is also established, under the charge of Dr. W. C. Glasgow.

ST. LUKE'S HOSPITAL is conveniently and centrally located on the corner of Tenth and St. Charles streets. The members of its professional staff are, with a single exception, connected with the Faculty or corps of instructors of the St. Louis Medical College, and its large and well-attended Dispensary department affords abundant and excellent material for clinical instruction.

The St. Louis Eye and Ear Infirmary, whose clinics have been conducted during the past five years for the exclusive benefit of the students of the St. Louis Medical College, is now carried on as a department of St. Luke's Hospital. The average attendance of out-patients is about sixty, in addition to the cases of eye and ear diseases in the hospital wards. To such advanced students as are fitted to profit by the study of this specialty, this clinic offers unequaled advantages. Systematic clinical instruction is given, throughout the year, by Dr. J. Green, the surgeon in charge of this department.

THREE TERM COURSE.

For the benefit of those students who are willing to devote an additional year's time to their College studies, and who desire a more thorough training in the several departments of medicine than is possible under the usual plan of two crowded courses of lectures, the Faculty offers a *graded course of instruction of three terms* (without additional charge.) Students who select this system of studies will pursue the following prescribed curriculum:

FIRST TERM. (*Junior Class.*)

Obligatory Studies: Chemistry, Anatomy, Dissections. (Attendance is also *advised* on the Lectures of Physiology and on Materia Medica.)

SECOND TERM. (*Middle Class.*)

Obligatory Studies: Dissections, Physiology, Therapeutics and Materia Medica, Clinical Medicine and Pathological Anatomy, Medical and Surgical Clinics. (Attendance is *advised*, besides, on the Lectures on Chemistry, on Surgical Anatomy and Fractures and Dislocations, and on the Principles and Practice of Medicine.)

THIRD TERM. (*Senior Class.*)

Obligatory Studies: Principles and Practice of Medicine, Principles and Practice of Surgery, Surgical Anatomy and Fractures and Dislocations, Obstetrics and Diseases of Women and Children. All Clinics. (Students of this class are *advised*, likewise, to dissect during this term.)

Examinations of students who pursue this course will be held at the end of each term as follows:

At the end of the *First Term:* Chemistry, Anatomy.

Second Term: Physiology, Therapeutics and Materia Medica.

Third Term: Medicine, Clinical Medicine and Pathological Anatomy, Surgery, Surgical Anatomy and Fractures and Dislocations, Obstetrics.

An examination once passed in any branch is accepted as final in that branch in fulfillment of this requirement of graduation. Students who fail to pass the examination in any branch at the end of the first or second term, have an opportunity to review this subject, and enter a re-examination at the end of the term following. This distribution of examinations over the three years of study will be found to be a great advantage and alleviation to students, as compared with the accumulation of all these tests at the end of the final course.

This graded system of studies will relieve students from the overcrowding of lectures unavoidable under the ordinary system, give them more time to pursue the fundamental sciences of chemistry, anatomy and physiology, and help them to a more rational understanding and more thorough knowledge of the practical branches. Hence the Faculty would earnestly recommend all students, if possible, to avail themselves of this offer, and select the three term curriculum.

For those who follow the three term course the fees will be:

For the First Term, including Matriculation.....	\$ 60 00
For the Second Term	100 00
For the Third Term	85 00

The Graduation Fee is additional.

SPRING SESSION, 1878.

The regular Course of Lectures, Didactic and Clinical, at this session begins March 11th, and continues through eleven weeks.

The system of teaching is carried out through recitations, examinations, clinics, and lectures.

CLINICAL LECTURES WILL BE DELIVERED BY

PROF. E. H. GREGORY, Surgical Clinic at the St. Louis Hospital.

PROF. J. T. HODGEN, Surgical Clinic at the City Hospital.

PROF. L. C. BOISLINIERE, Gynæcological Clinic at the St. Louis Hospital;

DR. G. A. MOSES, Assistant.

DR. S. POLLAK, Ophthalmic Clinic at the St. Louis Hospital.

DR. W. L. BARRET, Gynæcological Clinic at the City Hospital.

DR. J. GREEN, Ophthalmic Clinic at the City Hospital and at St. Luke's Hospital.

DR. J. M. SCOTT, Medical Clinic at the City Hospital.

DR. G. J. ENGELMANN, Demonstrations in Pathological Anatomy at the City Hospital.

DR. W. C. GLASGOW, Laryngological Clinic at the St. Louis Hospital.

These Clinics are continued through the summer.

THE DIDACTIC COURSE WILL BE GIVEN BY

- PROF. C. W. STEVENS, on Diseases of the Nervous System.
 DR. J. GREEN, on the Physiology and Pathology of the Eye.
 DR. W. L. BARRET, on Gynæcology.
 DR. H. H. MUDD, on Minor and Operative Surgery.
 DR. J. M. SCOTT, on Physical Diagnosis.
 DR. G. A. MOSES, on Diseases of Children.
 DR. W. E. FISCHER, on Materia Medica.
 DR. C. M. LITTON, Recitations in Chemistry.
 DR. H. T. BOUTWELL, Recitations in Anatomy.
 DR. L. A. LE BEAU, on Syphilis and Diseases of the Skin.

The Fee for the Course will be Twenty-five Dollars, which, for the students who remain through the ensuing winter session, will be deducted from the general fees.

The Spring Session is not estimated as a part of the two full courses required for graduation.

TEXT BOOKS.

The Faculty recommend the use of the following text-books; the one named first upon each subject in preference:

- Roscoe's* Elementary Lessons on Chemistry, or *Fownes' Chemistry*.
Gray's or *Wilson's* Anatomy; *Bellamy's* Surgical Anatomy.
Frey's Compendium of Histology.
Huxley's Elementary Lessons on Physiology (for junior students); *Foster's*,
Carpenter's (1876), or *Flint's* Human Physiology.
H. C. Wood's Therapeutics; *Stille's* Therapeutics and Materia Medica;
 or the U. S. Dispensatory.
Rindfleisch's Pathological Histology.
Watson's Practice of Physic; *Niemeyer's* Practice of Medicine; or *Bristowe's*
 Theory and Practice.
West, Meigs and Pepper, or *J. L. Smith*, on Diseases of Children.
Billroth's or *Page's* Surgical Pathology.
Ashhurst's, *Druitt's*, *Erichsen's*, or *Bryant's* Surgery.
Playfair's, *Leishman's*, *Bedford's*, or *Cazeaux's* Midwifery.
Soelberg Wells on Diseases of the Eye, or *Schweigger's Augenheilkunde*.

FEES.

Fees for the whole Winter Course.....	\$105 00
Matriculation Fee (paid but once).....	5 00
Demonstrator's Ticket.....	10 00
Graduation Fee.....	20 00

Hospital Tickets gratuits.

These fees must be paid promptly at the beginning of the session, and can in nowise be remitted or reduced.

Promissory notes are inadmissible; it is contrary to the regulations of the College to accept them.

All tickets may be obtained from the Dean.

The matriculation ticket must be taken out before any other ticket can be obtained.

Students may take out tickets for such departments of instruction as they may desire to attend.

Students will be expected to exhibit their tickets to the Dean after the first two weeks of the session.

Graduates of other respectable medical schools are admitted to the lectures on the payment of the matriculation fee.

Graduates of this institution have perpetual free admission.

Students who have attended two full courses of lectures in other accredited medical schools, whose requirements are at least equal to those of this College, will receive all the tickets, including that for dissections, to the lectures of this College, for seventy-five dollars, exclusive of the matriculation fee.

REQUISITES FOR THE DEGREE OF DOCTOR OF MEDICINE.

1. The candidate must be twenty-one years of age, of good moral character, and must have been engaged in the study of medicine for three years (courses of lectures included.)

2. He must have attended two full courses of lectures. If he have attended a full course in some accredited medical institution, or been in reputable practice for four years, he may, after attendance upon a full course of lectures in this Institution, present himself for graduation. The Dissecting Ticket must also have been taken continuously in this or some other medical school. He must also have followed the practice of a hospital.

3. He must undergo a satisfactory examination on all the branches taught in this College, and write an acceptable thesis in the English, Latin, French, or German language, on some subject connected with medicine. A second regular examination will be held in the course of the summer. Applicants who have complied with all the requirements, may present themselves at either of these examinations. *At no other time* will students be examined.

4. He must, by the first of February, notify the Dean, in writing, of his intention to become a candidate, and deliver to him his thesis and graduation fee, both of which will be returned in case of withdrawal or rejection.

The requirements for an *ad eundem* degree in this College are: A diploma from an accredited medical school; satisfactory testimonials from

regular physicians with respect to character and professional standing; an attendance on the lectures from time to time during the session at which it is desired to graduate; and a satisfactory examination on all the branches taught in the College. Candidates for an *ad eundem* degree must matriculate, and pay the graduation fee of twenty dollars.

BOARDING, including lights and fuel, can be obtained in respectable private families, at convenient distances from the College, at prices ranging from four to six dollars a week. Students, on their arrival in this city, are requested to report to the Janitor, at the College, northeast corner of Seventh and Myrtle streets, who will assist them in obtaining board without delay. Letters addressed to any member of the Faculty will receive prompt attention. Alumni of the College, and other medical practitioners, who may desire to receive the Annual Announcement regularly, are respectfully requested to send their names and addresses to the Secretary of the Faculty, Dr. J. S. B. ALLEYNE, 1903 Carr street; notice of any change of residence is also desired. All further information may be obtained by addressing the Dean, or calling upon him at his office, at the College, Seventh and Myrtle streets.

J. T. HODGEN, M. D., *Dean*.

MISSOURI DENTAL COLLEGE.

Lectures in the Missouri Dental College, which is connected with this Institution, will commence at the same time as in the Medical College, and continue till about the middle of March.

<i>Fees for full Course of Lectures</i>	\$100 00
<i>Matriculation Fee (paid but once)</i>	5 00
<i>Demonstrator of Anatomy (extra)</i>	10 00
<i>Diploma</i>	30 00

For particulars send for an Announcement of the Missouri Dental College.

W. H. EAMES, D.D.S., *Dean*,

1224 Washington Avenue.

Wood, James Franklin...	Hypodermic Medication	Chapel Hill, Mo.

QUIZ CLUB

— OF THE —

St. Louis Medical College.

ESTABLISHED 1869.

The Facts and theories presented in the lecture room are gleaned from a literature so extensive and an experience so broad, that it is impossible for any student to thoroughly comprehend and digest by his own efforts the course presented during the session. The QUIZ CLUB presents to the student an opportunity for the free discussion of the important points of the subject-matter of the lectures, and thus enables him to express concisely his views, corrects erroneous conceptions, fixes the salient points in his memory, and prepares him not only for the Green Room, but also for the emergencies of practice.

We offer to the Students a Quiz on

Anatomy,	-	-	-	-	-	By Dr. J. J. McDowell.
Obstetrics,	-	-	-	-	-	" " Wm. L. Barret.
Diseases of the Chest,	-	-	-	-	-	" " W. Carr Glasgow.
Surgery,	-	-	-	-	-	" " Henry H. Mudd.
Physiology,	-	-	-	-	-	" " John Bryson.
Chemistry,	-	-	-	-	-	" " John Green.
Materia Medica and Therapeutics,	-	-	-	-	-	" " W. E. Fischel.
Theory and Practice,	-	-	-	-	-	" " James M. Scott.

The Junior Department comprises a Quiz on

Anatomy,	-	-	-	-	-	By Dr. Henry T. Boutwell.
Chemistry,	-	-	-	-	-	" " Chas. M. Litton,
Physiology,	-	-	-	-	-	" " Isaac N. Love.

Examinations commence October 8th, 1878, and will be held nightly during the entire session. One Quiz each week on every subject.

The Fee for the Course will be \$12.00, or, for each separate ticket \$2.00.

For further information, inquire of

HENRY H. MUDD, M. D.,

No. 502 N. Fourteenth Street.

N. B.—Special Courses will be given, if desired, during Winter and Summer Session, in the different departments, to Students or Practitioners.

THE
Alumni Association
OF THE
ST. LOUIS MEDICAL COLLEGE.

Officers for the Years 1877-78.
